

“HOW TO BUILD A LIFE” INTELLIGENT LIFE STRATEGIES

Great, iconic buildings and structures never begin at the top, but at the bottom. Just like your life. It's the foundation that determines the quality of a building; and it will be the foundation of your life that determines the value of your future.

This course focuses on life building. From this course you will be able to:

- Adjust your understanding of the purpose of your life.
- Begin to identify your life's passions.
- Identify the top qualities that employers are looking for.
- Identify and use your top strengths by recognizing the "themes" of your life.
- Improve your ability to connect with people of different generations.
- Improve your ability to chase opportunities (including making stellar resumes and memorable interviews).
- Develop a workable life plan (including setting priorities, building "life fences" and the understanding the qualities that predict success).

Conference Outline

- **“You Are What You Think”** In this session we will discuss the importance of adjusting your “thinking” about your life. If you know you were born for a purpose, you just might strategize your life differently!
- **“Passion Finder”** Don't know where to begin? Can't figure out who you want to be or what you want to do? Let's start by identifying your passions. When you are passionate about something, it often leads to finding your life's path!
- **“Find Your Strengths!”** If you can identify your strengths and find your life's “themes” you can use them to accelerate your success!
- **“The Strategy!”** it's all in the plan! This session is about setting priorities, building “fences,” going after jobs, making resumes and attending interviews.
- **“Great Expectations”** What really predicts future success? What are the qualities and behaviors that really indicate that your future is bright? Maybe we're impressed with all the wrong things. Prepare to be surprised!

DR. PHIL JOHNSON

Dr. Phil Johnson is the president and founder of Global Next Research Group and Leadership Institute. He has conducted research and hosted conferences throughout the US, Europe and the Middle East. Thorough insight and humor, he changes the way people think about life, leadership and purpose.
